

EMERGENCY RESPONSE

PRIMA Automation & Control specialises in automation & controls support, repairs and bespoke solutions using off the shelf components.

We are based in the UK, therefore in these uncertain times, where international support is difficult, we can provide a full range of support for UK-based companies, without any issues with international travel.

In today's highly sophisticated manufacturing facilities, automation and control systems play an integral role. We cover an extensive range of control systems and components.

Repairs & Spares

Whether they are old, new or obsolete we can often source hard to find components, identify backward-compatible replacements or offer a cost-effective and convenient repair service across a wide range of manufacturers.

- Many types of industrial drives and motors (AC, DC, Servo, Stepper)
- PLC, interface modules, I/O modules, processors, power supplies
- PCs, HMI and peripheral devices

Technical Support

Whether it's planned or unplanned downtime, our engineers are available to resolve your issues – support for machinery breakdown, install and commission a new system, scheduled maintenance or holiday cover.

Drive upgrades made easy

We are here to make the process as stress-free and cost-effective as possible. Our engineers will work with your existing wiring diagrams to specify new drives that will fit into your existing application and installation environment.

Integration/Automation

Whether you are looking to integrate equipment, automate manual processes or migrate to newer faster technology to improve productivity, our dedicated team will work closely with you, from creating an accurate scope definition, specification and design through to installation and commissioning.
